

Visual

A man signing information in Auslan against a plain white background.

Dialogue

A dictionary, as we know it, is a book of words and their meanings. We currently at Signpedia, have compiled A - P, and we're hoping to continue P - Z in the future. With your input and support, it will continue to grow.

One group of people, who understand words, but when using iconic signs, they may feel unfamiliar or challenged when communicating using visual methods, but keen to improve.

Another group, who is familiar at iconic signing, but may find it difficult to translate that back into a specific word.

The dictionary benefits both groups, improving signs and vocab.

Did I mention it's free too?

Enjoy!
